

Resinex supplies A.B. Pharos Marine products.

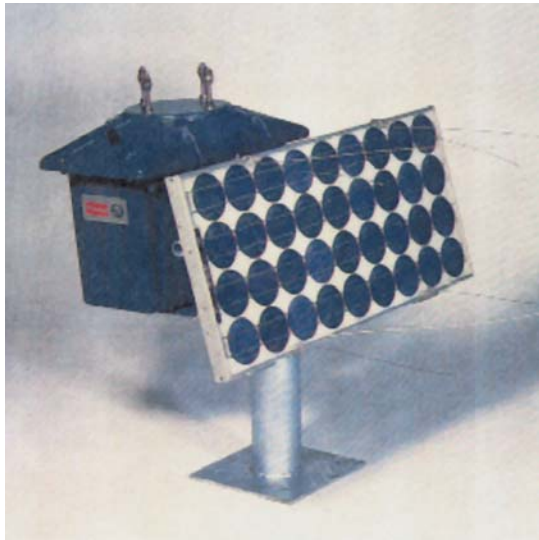

Pharos Marine manufactures a complete range of 85mm fresnel lens lantern's to meet the demand of the marine environment.

The LED-85P marine lantern is a lightweight, versatile, compact lantern specifically developed for use on buoys. The wide vertical divergence compensates for the rolling action of a buoy.

The FA-249 & FA-250 Marine lanterns offer ranges up to 10nm and can be supplied with our standard 4 or 6 place flashchangers which has 256 pre-set flashing characteristics available

Pharos Marine Fixed Modular Solar System are designed to suit many applications. The units can be supplied with a variety of solar panel & battery configurations.

Pharos Marine can offer a complete range of fog signals and fog detectors both for on-shore and offshore hazardous area applications.

Pharos Marine released the most advanced radar responder (Racon) into the market in January 2000.
